

VENTILATE WITHOUT HEAT LOSS AND GET RID OF HUMIDITY

Key benefits of ventilation with RECUAIR

- ✓ You ventilate automatically, efficiently and economically
- ✓ Free of noise, odors, allergies, and mold
- ✓ Remote control via a smart mobile application
- ✓ 5-year warranty

Treat yourself with fresh air and quality sleep

Fresh air significantly affects our health, sleep, concentration and energy. Its absence leads to fatigue, poor sleep, and other chronic problems.

Clean your air of allergens and dust

Say goodbye to allergies caused by traditional ventilation through windows. Thanks to Recuair's recuperation system, pollen and allergens will not enter your home.

Ventilate without odors and noise from outside

With filtration and noise reduction, you will enjoy silence and fresh, clean air without noise, smoke, or other odors.

Get rid of unhealthy moisture indoors

The automated Recuair ventilation system prevents excess humidity and, as a result, the formation and spread of mold.

Save nature and your finances

Ventilation with closed windows helps optimize energy consumption in your household.

MOBILE APPLICATION

You can conveniently control the entire ventilation system remotely via the remote control or directly from your mobile or tablet using an app.
